

New link between Vitamin B12 uptake receptor and Dementia

Omar Abuyaman, a PhD student at Aarhus University Hospital, and his colleagues found a link between vitamin B12 uptake receptor to both dementia diagnosis markers and cognitive scores. This new link could be of importance in understanding the possible effect of vitamin B12 on dementia and also may provide a new tool in Dementia diagnosis. About this topic and more , Omar Defending his dissertation on Friday 30th Sep. at 1 pm

The defence is public and takes place on Department of Clinical Biochemistry, Palle Juul-Jensens Boulevard 99, Entrance 3 (follow the signs to 'Blodprøver og Biokemi'), Meeting Room A3, Aarhus University Hospital. The title of the project is Vitamin B12 uptake receptor (CD320) Occurrence of its soluble form in human and a search for additional receptors . For more information, please contact PhD student Omar Abuyaman, email: o.abuyaman@gmail.com, Phone +45 60522433
