Press release (Danish)

Rehabilitering efter hospitalsudskrivelse til ældre med hoftebrud bosat i eget hjem

Monica Milter Ehlers har gennem sit ph.d. studie identificeret og syntetiseret kvalitative og kvantitative studier om ældres egen vurdering af deres funktionsevne, funktionsevnedenssættelse samt rehabiliteringsforløb efter hoftebrud.

Monica Milter Ehlers har desuden undersøgt, hvordan et multidisciplinært hospitalbaseret team samt et multidisciplinært kommunalt rehabiliteringsteam planlagde og udførte rehabilitering af ældre bosat i eget hjem efter hoftebrud. Monica Milter Ehlers har ligeledes undersøgt, hvordan ældre bosiddende i eget hjem samt deres nære pårørende oplevede rehabiliteringen en måned efter hoftebruddet.

Ph.d. studiet er gennemført ved Institut for Folkesundhed, Sektion for klinisk socialmedicin og rehabilitering, Aarhus Universitet.

Dette resumé er udarbejdet af den ph.d. studerende.

Press release (English)

Post-discharge rehabilitation of older community-dwelling adults after hip fracture

During her PhD studies, Monica Milter Ehlers has identified and synthesized scientific evidence on older adults' experiences of their physical and mental health, functional performance and

participation in everyday life after hip fracture. Additionally, Monica Milter Ehlers has determined the influence of personal or social factors on functional capacity after fracture.

Monica Milter Ehlers has also investigated how a multidisciplinary hospital-based team and a multidisciplinary municipal rehabilitation team planned and performed postdischarge rehabilitation of older community-dwelling adults after hip fracture. Furthermore, the experiences of community-dwelling older adults and their relatives in relation to rehabilitation four weeks after hip fracture was investigated.

The PhD degree was completed at the Department of Public Health, Section for Clinical Social Medicine and Rehabilitation, Aarhus University.

This résumé was prepared by the PhD student.
