

Press release

Please fill in this form and return it to graduateschoolhealth@au.dk in Word format no later than three weeks prior to your defence.

Basic information

Name: Denise Happ Email: dhapp@clin.au.dk Phone:

Department of: Clinical Medicine

Main supervisor: Gregers Wegener

Title of dissertation: Experimental investigations of depression and stroke as comorbidities

Date for defence: 12/06/2020 at (time of day): 16:00 Place: Online Zoom Event.

Press release (Danish)

Eksperimentelle undersøgelser af komorbiditet mellem depression og slagtilfælde

Apopleksi (slagtilfælde) og depression er to alvorligt invaliderende lidelser, der påvirker millioner af mennesker på verdensplan. Tilstedeværelse af begge lidelser samtidig associeres med en forværret nedsættelse af kroppens normale funktioner efter et slagtilfæld. For bedre at identificere de biologiske mekanismer, der kan forbinde apopleksi og depression med hinanden, samt for at udvikle bedre metoder til forebyggelse eller behandling, er gode dyremodeller nødvendige. Dette blyses i et nyt ph.d.-projekt fra Aarhus Universitet, Health. Projektet er gennemført af Denise Happ, der forsvarer det d. 12/06/20.

I ph.d.-projektet udførtes et systematisk review over allerede eksisterende dyremodeller af post-apoplektisk depression. I yderligere prækliniske eksperimentelle studier karakteriseredes nye potentielle dyremodeller af præ-apoplektisk depression og post-apoplektisk depression. Samlet set giver eksperimenterne og den systematiske gennemgang nye indsigt i den eksperimentelle modellering af komorbid apopleksi og depression, men fremhæver også vanskeligheden ved at etablere pålidelige og passende dyremodeller.

Forsvaret af ph.d.-projektet er offentligt og finder sted den 12/06/20 kl. 16:00. Grundet COVID-19 vil forsvaret blive gennemført online via Adobe Connect. Link med adgang til forsvaret er: <https://c.deic.dk/tnu/>. Deltagere bedes logge på som 'Gæst' med angivelse af navn.

Titlen på projektet er "Eksperimentelle undersøgelser af komorbiditet mellem depression og slagtilfælde". Yderligere oplysninger: Ph.d.-studerende Denise Happ, e-mail: dhapp@clin.au.dk.

Bedømmelsesudvalg:

Associate Professor Rúbia Weffort de Oliveira Departamento de Farmacologia e Terapêutica, Universidade Estadual de Maringá, Brazil

Professor Fred Colbourne Faculty of Science, Intracerebral Hemorrhagic Stroke Laboratory, University of Alberta, Canada

Associate Professor Charlotte Brandt Sørensen (chair) Department of Clinical Medicine - The Department of Cardiological Medicine B, Aarhus University

Press release (English)

Experimental investigations of depression and stroke as comorbidities

Stroke and depression are two debilitating diseases affecting millions of people worldwide. If depression co-occurs with stroke, it can worsen functional outcomes following stroke. Appropriate animal models are needed to better understand the mechanisms linking stroke and depression and to identify preventative and therapeutic strategies. This topic is being explored in a new PhD study from Aarhus University. The project was carried out by Denise Happ, who is defending her dissertation on 12/06/2020.

In this PhD project, we performed a systematic review to provide a broad overview of animal models used to study post-stroke depression. In the additional experimental studies, we aimed to characterize new potential animal models of pre-stroke depression and post-stroke depression. Overall, our experiments and the systematic review provide new insights into the experimental modeling of comorbid stroke and depression, but also highlight the difficulty of establishing reliable and appropriate animal models.

The defence is public and takes place on 12/06/20 at 16:00. Due to COVID-19, the defence will be held online via Adobe Connect. Link with access to the defence is: <https://c.deic.dk/tnu/>. Participants should log on as 'Guest' and write their name.

The title of the project is "Experimental investigations of depression and stroke as comorbidities."

For more information, please contact PhD student Denise Happ, email: dhapp@clin.au.dk.

Assessment committee:

Associate Professor Rúbia Weffort de Oliveira Departamento de Farmacologia e Terapêutica, Universidade Estadual de Maringá, Brazil

Professor Fred Colbourne Faculty of Science, Intracerebral Hemorrhagic Stroke Laboratory, University of Alberta, Canada

Associate Professor Charlotte Brandt Sørensen (chair) Department of Clinical Medicine - The Department of Cardiological Medicine B, Aarhus University

Permission

By sending in this form:

- I hereby grant permission to publish the above Danish and English press releases.
- I confirm that I have been informed that any applicable inventions shall be treated confidentially and shall under no circumstances whatsoever be published, presented or mentioned prior to submission of a patent application, and that I have an obligation to inform my head of department and the university's Patents Committee if I believe I have made an invention in connection with my work. I also confirm that I am not aware that publication violates any other possible holders of a copyright.
