

## Press release

Please fill in this form and return it to [graduateschoolhealth@au.dk](mailto:graduateschoolhealth@au.dk) in Word format no later than three weeks prior to your defence.

### Basic information

Name: Kamilla Pernille Bjerre Email: kambje@rm.dk Phone: 53535832

Department of: Clinical Medicine

Main supervisor: Hans Eiskjær, MD, Prof., DMSc

Title of dissertation: "Cardiac Allograft Vasculopathy in heart transplant recipients: Mechanisms and progression"

Date for defence: 22.04.21 at (time of day): 15:30 Place: Auditorium B (Indgang G, G206), The defence can be attended virtually via Zoom: <https://aarhusuniversity.zoom.us/j/9340584433>

Press release (Danish)

Krænspulsåresygdom hos hjertetransplanterede patienter

Krænspulsåresygdom (CAV) efter hjertetransplantation (HTx) er en hyppig og frygtet komplikation, der angriber både krænspulsårer og små blodårer i hjertet. Idet CAV ofte er uden symptomer, er invasiv CAV-overvågning med koronar arteriografi (KAG) nødvendig hvert eller hvert andet år efter HTx, hvilket udsætter patienter for risici og ubehag. Årsagen til CAV er meget kompleks og ikke fuldt klarlagt. Behandlingsmulighederne er begrænsede og inkluderer blandt andet blodpladehæmmer-behandling med Hjertemagnyl som ved almindelig krænspulsåresygdom. I denne Ph.D.-afhandling var formålene at undersøge mulige mekanismer involverede i udviklingen af CAV samt effekten af behandling med Hjertemagnyl hos HTx-patienter. Desuden var formålet at undersøge, hvorvidt ikke-invasive ekkokardiografiske metoder kunne anvendes til screening for CAV. Resultaterne præsenteres med baggrund i et nyt ph.d.-projekt fra Aarhus Universitet, Health. Projektet er gennemført af Kamilla Pernille Bjerre, der forsvarer det d. 22/4-21.

Forsvaret af ph.d.-projektet er offentligt og finder sted den 22/4-21 kl. 15:15 i Auditorium B, Indg. G, G206, Aarhus Universitetshospital, Palle Juul Jensens Boulevard, Aarhus N. Titlen på projektet er "Krænspulsåresygdom hos hjertetransplanterede patienter: Mekanismer og progression". Yderligere oplysninger: Ph.d.-studerende Kamilla Pernille Bjerre, e-mail: kambje@rm.dk, tlf. 5353 5832.

Bedømmelsesudvalg:

Læge, lektor og PhD Nicolaas De Jonge  
Kardiologisk afdeling, enhed for hjertetransplantation, University Medical Center, Utrecht,  
Netherlands.

Overlæge, lektor og PhD Lene Holmvang  
Kardiologisk afdeling, Rigshospitalet, København, Danmark.

Overlæge, Professor, DMSc Jens Erik Nielsen-Kudsk (chairman)  
Kardiologisk afdeling, Aarhus Universitetshospital, Danmark.

Press release (English)  
Coronary artery disease in heart transplant patients

Coronary artery disease (CAV) after heart transplantation (HTx) is a frequent and feared complication that attacks both the coronary arteries and small blood vessels in the heart. As CAV is often asymptomatic, invasive CAV monitoring with coronary angiography (CAG) is necessary every one or two years after HTx, exposing patients to risks and discomfort. The cause of CAV is very complex and

not fully elucidated. The treatment options are limited and include, among other things, platelet inhibitor treatment with aspirin as in common coronary artery disease. In this Ph.D. thesis, the aims were to investigate possible mechanisms involved in the development of CAV as well as the effect of treatment with aspirin in HTx patients. In addition, the purpose was to investigate whether non-invasive echocardiographic methods could be used for screening for CAV. The results are presented on the basis of a new PhD project from Aarhus University, Health. The project was carried out by Kamilla Pernille Bjerre, who is defending her dissertation on 22/4-21.

The defence is public and takes place on 22/4-21 at Auditorium B, Indg. G, G206, Aarhus Universitetshospital, Palle Juul Jensens Boulevard, Aarhus N. The title of the project is "Cardiac Allograft Vasculopathy in heart transplant recipients: Mechanisms and progression". For more information, please contact PhD student Kamilla Pernille Bjerre, email: kambje@rm.dk, Phone +45 5353 5832.

Assessment committee:

Nicolaas De Jonge, Associate professor, MD, PhD  
Department of Cardiology, Unit for Heart Transplantation, University Medical Center, Utrecht, Netherlands.

Lene Holmvang, Associate professor, MD, PhD  
Department of Cardiology, Rigshospitalet Copenhagen, Denmark.

Jens Erik Nielsen-Kudsk (chairman), Professor, MD, DMSc  
Department of Cardiology, Aarhus University Hospital, Denmark.

## **Permission**

By sending in this form:

- I hereby grant permission to publish the above Danish and English press releases.
- I confirm that I have been informed that any applicable inventions shall be treated confidentially and shall under no circumstances whatsoever be published, presented or mentioned prior to submission of a patent application, and that I have an obligation to inform my head of department and the university's Patents Committee if I believe I have made an invention in connection with my work. I also confirm that I am not aware that publication violates any other possible holders of a copyright.
